Abstract (en)
[origin: EP0041060A2] 1. A water cannon comprising a swivel drive (3a, 3b) for pivotally moving the cannon tube (2) about a horizontal axis and a vertical axis, a control device (4) for controlling the swivel drive (3a, 3b), and a lever (5, 5a) for indicating the position of the cannon tube, characterized in that the control device (4) comprises a control lever (5), which constitutes a symbol for the cannon tube (2) and like the cannon tube (2) is pivoted on a horizontal axis and a vertical axis, that the control device (4) controls the swivel drive (3a, 3b) so that the cannon tube (2) is moved to a desired position, which is determined by the instantaneous position of the control lever (5), and that a coupling key (7) is provided for opening or closing the controlling contact between the control lever (5) and the control device (4).
