Abstract (en)  
[origin: EP0041616A1] A drawer 12 is mounted on two slides 24, each having a stationary rail 28 and a running rail 30 to which the drawer is connected by locking elements 40, 42 forming a catch connection which is releasable by raising the front of the drawer. One locking element 40 is resilient transversely to the sliding direction so that the drawer 12 becomes locked to the running rail 30 upon sliding in the insertion direction.
