Abstract (en)

[origin: EP0041905A1] 1. Method for adhesively securing a flexible and impervious material (7, 7') to a lampshade frame, formed by at least a lower circle (8) and an upper circle (9) connected by reinforcements (10), characterized in that perforations (14, 17, 17', 26, 40, 41) are made in the said flexible and impervious material (7, 7') in areas corresponding to the parts of this material (7, 7') to be fixed to the circles (8, 9) of the frame and in that one spreads on the outside of this material (7, 7') stretched over the frame, an adhesive which acts by capillarity, through the perforations (14, 17, 17', 26, 40, 41) previously formed, in order to fix the flexible and impervious material (7, 7') on each circle (8, 9) of the frame.
