Abstract (en)
[origin: EP0042527A2] A housing for a ceramic PTC resistor (4) is proposed which is used in a unit for the vaporisation of chemical disinfectant and/or insecticidal substances and in which one housing part (1) has a cut-out (3) in its base (2) and elevated walls (15,16,21,22,28,29) on its sides and the other housing part (19,27,34) engages in detents (17,18,25,26,30,31) so that a sprung connecting electrode (7) produces an opposing pressure.
