Abstract (en)
[origin: EP0042610A1] 1. Sheet clamping device for drawing- and writing-boards with at least two clamping bars which are preferably fastened at right-angles to each other on a base, coupled with each other and jointly actuatable, characterized in that the clamping bars (2, 3) are attached on the base (1) so as to be tiltable or flappable, that one of the clamping bars (2) at the same time serves as actuating element and that between this actuating clamping bar (2) and the additional clamping bar (3) or several additional clamping bars, a carrier element (5, 11) is arranged or a plurality of carrier elements (14, 16) is arranged, each carrier elements engaging under and coupling the clamping bars.
