Abstract (en)

[origin: EP0042899A1] 1. Centrifugal dryer with a cylindrical bowl rotating around a vertical axis, including a load control equipped with a feeler (30) and a vertical washing device (38) located inside the bowl and whose position is adjustable, characterized by the fact that the washing device (38) is mounted on a mobile support (44) kinematically connected to the feeler (30) of the load control or to the support (32) of the latter, in such a manner that the position of the washing device will be a function of the thickness of the layer of the product loaded into the bowl.
