Abstract (en)
[origin: EP0043096A1] 1. An apparatus which may be used as an insert for transport and/or storage containers, for storage configurations, and for the handling, transport and/or storage of radioactive materials, in particular for receiving radiation-exposed fuel rods or absorber rods, consisting of a box-shaped container (1) of a cuboid-like shape, the external diameters of which correspond to the respective principal dimensions of a fuel element, characterized in that the container (1) has on one longitudinal side a lid (2) which may be locked and which is positioned with its movement, operation and closing elements (3, 4, 8, 9) inside the contour of the container.
