Abstract (en)

1. A circular segmented cutting disc with constant distance (5) between adjacent segments (1) over the depth of the segment having a core with relief bores (7) with slots which extend to the periphery of the core wherein each relief bore (7) with a slot extending to the periphery of the core is located within the limites of a segment (1).

Abstract (de)

Die Erfindung betrifft segmentierte Trennscheiben, deren schlitzzartig zur Kernaußenseite führende Entspannungsbohrungen (7) jeweils innerhalb eines Segments (1) liegen und bei denen der Abstand (5) benachbarter Segmente über die gesamte Segmenthöhe konstant ist.
