Abstract (en)

[origin: EP0043364A1] 1. Arrangement for introducing a flexible starter bar (7) into a continuous casting plant, in particular a steel-slab continuous casting plant, comprising a transporting car (1) including a slide or roller way (8), by which the starter bar is transportable to an introduction part (4) of the continuous casting plant, the transporting car carrying a conveying means (12) for the starter bar and the slide or roller way including an arcuate end section (11) on which a guiding means (13) supporting the starter bar on opposite sides, advantageously on the arc outer and inner sides is provided, characterized in that the guiding means (13) is mounted so as to be displaceable and fixable in the longitudinal direction (14) of the transporting car (1).
