Abstract (en)
[origin: WO8102039A1] Internal combustion engine having at least one primary cylinder (A, B) and an associated secondary cylinder (C) operably coupled to said primary cylinder for enabling further expansion of a fuel/air mixture ignited in said primary cylinder; and means for applying heat to said secondary cylinder; and wherein the pistons of said cylinders are coupled to a common crankshaft.

Abstract (fr)
Un moteur a combustion interne possede au moins un cylindre primaire (A, B) et un second cylindre associe (C) couple en fonctionnement audit premier cylindre pour permettre une expansion supplementaire d'un melange combustible/air allume dans le premier cylindre, et des moyens d'application de chaleur audit second cylindre, les pistons des cylindres etant couples sur un vilebrequin commun.
