Abstract (en)
[origin: EP0043474A1] 1. Laundry-drying stand with hanging elements, such as cords or bars, held between two carrier bars arranged parallel to one another, the two carrier bars being allocated to a stand which has swivelling support legs, of which two at a time, which diverge at their lower ends, are connected together at their upper ends by a connecting part, which at the same time supports one of the carrier bars, and the two connecting parts being connected together by a bar running horizontally, characterized in that each connecting part (21, 22) has a pocket (24) formed by two parallel walls (28) on both sides of the socket (25) for the connecting bar (23), the upper end of one support leg (20) being swivel-mounted in each pocket (24), and in that the support legs (20) in the ineffective position are locked with their free ends in the pockets of the opposite connecting part (21, 22).
