Abstract (en)
[origin: EP0044055A1] 1. Toilet cabin constructed from prefabricated elements, comprising a shell-shaped floor pan (2), wall elements (7, 8, 9) and a shell-shaped ceiling, characterized in that the wall elements (7, 8, 9) overlap at the inside the raised rim (4) at at least the floor pan (2) at a seam (24) formed by a step (22) with an adjoining bead (23), in that the said elements are provided with lateral rim flanges (16) which protrude at right angles from the back side of the wall elements, and in that they can be attached by means of rearwardly projecting connecting elements via connecting sections (13) to the walls of the room determined for the installation of the toilet cabin or to mounting sections (14) accommodating an exterior casing.
