Abstract (en)

[origin: EP0044880A1] 1. Slat for a roller shutter or multi-section over-head door comprising a hollow section (2; 92, 93) formed from two sheet metal shells (7, 8) of which the hollow space (3) is filled with a heat-insulating material having hinge elements (5, 6) provided on the longitudinal sides of the hollow section, and having two slots (9) which extend, next to the two hinge elements, along the length of the slat and which are bounded by side-pieces (12) which are bent in towards the hollow space, characterised by the following features : (a) the slots (9) are located on the broad side of the inner sheet metal shell (7) of the slat, (b) the slots (9) are bridged by narrow cross-pieces (11) formed by breaks in the slots, (c) the side-pieces (12) of the slots (9) have, on the hollow space side at the root of the bend, notches (15) which extend parallel to the slot.
