Abstract (en)
[origin: EP0044899A1] 1. A multi-member wall, in particular a sound insulation wall, consisting of finished parts (1) and a filler material (5) characterized by elongate finished parts (1) of one single type, which, at the two outer sides of the wall, form outwardly open chambers which accomodate the filler materials (5), are offset with respect to one another in checkerboard formations, merge into one another between the outer sides of the wall and the ends of which are arranged such that they are superposed.
