Abstract (en)

[origin: EP0044946A2] A rack for supporting and moving concrete roof tiles with pallets into curing stations having lateral slide rails (6; 7) positioned in tiers and in pairs facing one another to carry the side edges of the pallets (23; 25a-25e). To accommodate normal roof tiles (26a-26e) and also special tiles of different dimensions, in particular narrower ridge tiles (24) and verge tiles with a side overhang, the lateral slide rails (6; 7) have opposing and mainly horizontal flanges (12; 12 min), the outer borders of which connect to a step (13; 13 min) extending in upward direction. The slide rails (6; 7) consist preferably of multiply bent off sheet metal parts with doubled sheet metal strips in the area of the flanges (12; 12 min).
