Abstract (en)

[origin: EP0045690A2] The applicator device comprises - a reservoir (1) containing the product to be applied, in which is optionally provided an element for homogenising the products which have a tendency to separate easily, - a metering and feed element (4) comprising a movable member (5) and, if necessary, an end-of-travel device (6), and - a dispenser element (8) permitting the application of the product on a substrate. The applicator device according to the invention is used in the field of cosmetics, for example for applying eyeliners and nail varnish, and in the field of drawing and painting. <IMAGE>
