Abstract (en)  
A method of manufacturing shuttering such as: sheetings and tunnel frameworks, used in building. These shutterings are composed of rectangular or square profile tubes (2, 3, 6, 7) forming a frame intended to receive a slewable and convertible shuttering face (4). The most advantageous applications for this shuttering are a tunnel framework, readily adaptable to the various floor bearing surfaces, and a basis for stabilising sheetings.

Abstract (fr)  
L'invention concerne un procédé de fabrication de coffrage outil tels que : banches et coffrages tunnel, utiles dans le bâtiment. Ces coffrages sont composés par des tubes profilés (2, 3, 6, 7) rectangulaires ou carrés formant une charpente destinée à recevoir une face coffrante orientable (4) et transformable. Les applications les plus intéressantes de ce coffrage sont un coffrage tunnel, adaptable aisément aux différentes portées de plancher et un principe de stabilisation des banches.
