Abstract (en)  
[origin: EP0045879A1] A razor blade assembly comprising a cap portion (4) and a base portion (2), a guard portion (8) attached to and extending generally parallel to the base portion (2), arm means (22, 24, 26) extending from the base portion toward the guard portion, and blade means (28, 30) disposed on the arm means, the arm means comprising leaf spring-like structures permitting movement of the blade means relative to the base portion, guard portion and cap portion during a shaving operation. The guard portion may be fixed with respect to the base portion or may be supported by further flexible arm means (6) for movement with respect thereto. The blade means may be relatively solid strips or may have substantial apertures (32 min , 50 min ) therein.
