Abstract (en)  
[origin: EP0046038A2] The invention provides a roll-on dispensing device for a viscous fluid or powder of the kind comprising a ball rotatably mounted in a housing which provides an inlet and an outlet for fluid or powder dispensed by rotation of the ball, wherein the housing is provided with a plurality of arcuate projections extending from the inlet side to the outlet side of the ball, serving to support the ball and to retain the ball in place, said projections having spaces in between through which fluid or powder can be fed by rotation of the ball. The device is used to dispense viscous fluids, especially depilatories, and powders. A method of removing hair is also described.
