Abstract (en)
A baby carrier which, in known manner, comprises a body portion having leg holes, for supporting the baby to be carried, and a pair of shoulder straps and a pair of waist straps to be secured together in order to support the baby carrier on the body of a wearer, is provided with a buckle, one component (30) of which incorporates anchorages (36,38) for one shoulder strap (16) and one waist strap (22) respectively, and the other component (32) of which incorporates anchorages (54,46,50) for the other shoulder strap (18) and waist strap (26), the buckle being so constructed that when in the assembled condition the strap anchorages are held rigidly and closely adjacent to one another in such a manner that the axes of the straps converge substantially at the centre point of the buckle.
