Abstract (en)

[origin: ES8206687A1] A method is disclosed wherein a nonwoven fabric composed at least in part of thermally fusible fibers is at least partially fused and then is punched by needles to produce a soft, fluffy fabric that resists mechanical wear.

Abstract (de)

Die Erfindung betrifft ein Verfahren zur Herstellung eines flauschigen, insbesondere leichtgewichtigen, weichen Vliesstoffes, bei dem ein Vlies aus Stapel- und/oder Endlosfasern zunächst mit Hilfe von thermoplastisch erweichbaren Bindefasern durch Kalandrieren oder Thermofusion gebunden und dann anschließend nachgenadelt wird.
