Abstract (en)  
1. Belting comprising weft threads and two types of warp threads, characterised in that the weft threads (1) are disposed in pairs and consist of thin, tear-resistant material, one part (2) of the warp threads consisting of yarn material of high elongation properties and good restoring force while the other part (3) of the warp threads consists of yarn material of low fracture elongation properties but high strength, both parts (2 and 3) of the warp threads being woven with the same tread, a warp thread of one part (2) and one of the other parts (3) being disposed alternately beside one another, and in that the warp threads of one part (2) lie with a very low working in and are smooth in the woven fabric while those of the other part (3) show a higher level of working in.

Abstract (de)  
Gurtband aus Kett- und Schußfäden letztere (1) aus dünnem, reißfestem Material und die Kettfäden zum einen Teil (2) aus Garnmaterial hoher Dehnung sowie guter Rückstellkraft und zum anderen Teil (3) aus Garnmaterial geringer Bruchdehnung, aber hoher Festigkeit, wobei die beiden Teile der Kettfäden gleichtretend verwebt sind.
