Abstract (en)

Male's bathing costume (1) comprising at the inside thereof a plastics material shell element (2) that is substantially rigid and that can be positioned close to the genitals so as to protect these. For positioning the shell at the desired height, there are further provided positioning means consisting of a lower strip (5) and an upper strip (4) that can engage with a lower slot (6) and an upper slot (7), respectively, such as correspondingly provided on the shell itself.
