Abstract (en)
[origin: EP0047350A1] A dampening solution feed apparatus for an offset printing press has a form roller (20) in rolling contact with the plate cylinder (10) of the press, and a second roller (22) is provided in contact with the form roller (20). A supply of dampening solution is fed to the form roller and the rollers are arranged to rotate such that excess solution on the form roller is returned to a reservoir (26) between the rollers.
