Abstract (en)

1. Waste water pipe with cleansing hole and removable damming-up flap with the following features : - at a housing of plastics material is integrally formed a top (11), by which the cleansing hole, capable of being closed with a cover (12), is formed ; - the damming-up flap (14) is hinged at the top of an inlet opening (16) of the housing ; - the inlet opening merges into an inlet socket (20) ; characterised by the following further features : - the inlet socket (20) and the discharge socket (25) are separately formed parts, which can be screwed on the housing (10), for this purpose flanges (22), (10a) are integrally formed at the parts to be connected ; - around the inlet opening (16) of the housing a packing ring (17) is supported, with which an abutment plain (21) integrally formed at the inlet socket (20) is associated ; - at the housing is formed an abutment plain (19) around the discharge opening (18), which has the same diameter as the inlet opening ; - at the discharge socket (25) a packing ring (26) is supported, which is associated with the abutment plain (19) of the discharge opening (18) ; - in connection with the inlet opening a seat for the damming-up flap is formed at the housing.

Abstract (de)

Das Abwasserrohr weist einen Grundkörper (10) mit Deckel (12) und Rückstauklappe (14) auf, der besonders einfach und kurz ist und daher wirtschaftlich hergestellt werden kann. Es besteht die Möglichkeit, sowohl einlaufseitig als auch auslaufseitig bei der Montage Stutzen (20, 25) anzuflanschen. Im Bedarfsfall, wenn 2 oder mehr Rückstauklappen erforderlich sind, können eine entsprechende Anzahl dieser Grundkörper an den angeformten Flanschen miteinander verbunden werden.
