Abstract (en)  
[origin: EP0047943A2] 1. Dismantleable shelf stand of angular form, consisting of a column (1) of square tube with apertures (23) for the hooking-in especially of brackets (4) and of a lengthy foot part (2) resting on the floor and extending at right angles to the column (1), while on one end of the foot part (2) there are arranged upwardly directed hooks (7, 8) engaging in the apertures (23) of the column, characterised in that the foot part (2) is made as a square tube (6) on the upper support surface (6a) of which there is removably arranged at least one shelf-carrier strip (11, 12) extending in the longitudinal direction of the foot part, in that the column (1) has a downwardly opened aperture (23a) at the lower end and in that low on the foot part (2) there is provided a hook piece (7) which links itself into a body (21) secure in the square tube (6), into a neck of approximately the same width as the downwardly opened aperture (23a) of the column (1) and into a head (22) adapted to the internal form of the column and protruding from the end opening of the foot part.
