Abstract (en)
The invention is related to a not environmental polluting noise shield wall comprising several mutually spaced and at a distance from the source of noise erected uprights (1) between which a noise diverting panel (3) is positioned. According to the invention said noise shield wall is composed of horizontally extending wooden laths (4) that are positioned in a zigzag configuration. Preferably said panel at the side turned away from the source of noise comprises a flat wall (7) and noise absorbing material (6) mounted between said zigzag wall and said flat wall.
