Abstract (en)

[origin: WO8102698A1] In order to transport with simple means frameless molds arranged on a molding line (15) passing through supply, molding and cooling stations of a molding plant, so as to obtain a high finishing precision of the parts obtained, the acceleration and breaking forces required for the molding line (15) engaged or not with the molding line are adjusted for each case; these forces as well the forces opposite to the thermal expansion of the molds (17) are transmitted by the molds along the molding line.
