Abstract (en)

[origin: EP0048906A2] 1. Arrangement of media-conveying pipe lines in sanitary installations in a building with cold- and/or hot-water pipe lines with a supply line for each medium and at least two consuming devices (6) in a supply area, like e.g. a living area or a floor area, which are connected to connecting elements (4) for outflow fittings (5, 15), whereby each pipe line (3, 13) of a supply area conveying a medium leads from a connecting element (4) of a consuming device (6) to the next connecting element (4) of a further consuming device (6), characterised in that from the last connecting element (4) for a consuming device (6), arranged in the pipe line (3, 13), a further pipe line (8, 18) leads to the supply line (1, 11) or to a circulation line (11a).
