Abstract (en)
[origin: EP0049237A2] 1. Electronic gambling machine with a video monitor including a screen (2, 101) and a pen (8, 120) which, whenever it is pressed against the screen (2, 101), transmits a signal corresponding to this very point on the screen (2, 101) to a control unit (103), whereby a random generator is connected with the control unit (103), characterised by the fact that the playing area on the screen (2, 101) features the image of a roulette table and that there is a display (1) of the number selected by the random generator, whereby the control unit (103) corresponds to a counter which, according to the number of times or the period of pressing the pen against the screen (2, 101), raises the bet.
