Abstract (en)
[origin: EP0049434A2] 1. A cover for screen ceilings, to close off the terminal faces of ceiling strips with a substantially U-shaped cross-section, with at least two plug units (22, 23) on the inner face of the cover, one (22) of which is disposed near one end of the cover while the other (23) is disposed near the opposite end, and wherein each plug unit (22, 23) has at least two plug parts (24, 25) arranged spaced apart adjacent to each other, with outer plug surfaces (28, 29) facing outwards away from each other and designed to rest against the inner surface of the sides of the U-shaped ceiling strips, characterised in that the plug parts (24, 25) are hook-like or clawlike in construction, and their hook ends or claw ends form the plug surfaces (28, 29) which clamp fast against the internal surfaces on the sides of the strip.
