Abstract (en)
[origin: EP0050267A2] Device for illuminating from the rear large-area indicator boards transparent or translucent only in parts, such as, for example, scales, dial plates or the like, preferably so-called liquid-crystal displays, with a small-surface light source arranged in a housing, the housing receiving the light source having good reflection on the inside, preferably being mirrored and being equipped with a cover bearing against the rear side of the indicator board and being transparent and otherwise mirrored under the regions of the indicator board to be illuminated. <IMAGE>
