Abstract (en)

[origin: EP0051724A1] 1. A transportable hall, and more particularly for the amusement rides comprising a roof supported by at least one vertical column (10, 11), composed of roof trusses (20, 30) hinged to said column, which can be folded for transportation, and of a roof covering (2) spanning said roof trusses, characterized in that the vertical column (10) has on its upper end (11) radially projecting supporting arms (12, 13; 16, 17) provided with bearings (16a, 16b; 17a, 17b), preferably swivel bearings (14, 15) carrying radially extending roof trusses (20, 30) having their outer ends connected by detachable bordering trusses (40 to 45), the dimensions of said arms (12, 13) and of said roof trusses (20) being such that said swivel bearings (14, 15) are situated on an oval and that the end points of the roof trusses (20, 30) swivelled out in extension of said arms are situated on a circle, while the column (10, 11) is in the common center of said oval and of said circle.
