Abstract (en)

[origin: EP0052059A1] 1. A pourer spout for a receptacle such as a bottle of the kind comprising a skirt (4) engaged over a neck (2) of the said receptacle and a concentric tubular sleeve constituting a spout (7) which encloses a central transverse obstacle (8) connected to its wall by means of arms, openings (8a) being formed between the aforesaid arms, characterised in that the central transverse obstacle (8) and the arms define a dome which is concave in the direction of the interior of the associated receptacle, the lateral openings (8a) being formed in the side wall of the said dome.
