Abstract (en)  
[origin: US4441625A] A package having a resealable device for oxygen-sensitive products is in which the package is gas-tight and convenient to use. The package has an envelope sealed in a gas-tight manner, an outer container surrounding the envelope, and a resealable device. The resealing device, comprising a rigid frame and a cap fitting into the frame, is secured with its frame close to the top wall within the envelope. The top wall is removable by means of a tear strip. At the level of the resealable device, the outer container has a tear strip for removing its top wall.
