Abstract (en)
[origin: EP0052195A1] 1. Ink duct for a printing machine having a duct roller (1) defining the front boundary therefor, an ink knife (11) extending in the direction of the axis of the duct roller (1), and side walls (3, 4) abutting the ink knife (11) and disposed at right angles to the axis of the duct roller (1), which side walls each consist of a main part (3) secured to the ink duct stretcher (2) and a front part (4) secured thereto, which can be placed against the duct roller (1) to effect sealing, and has a frontal face corresponding to the curvature of the surface of the duct roller, characterised in that the plate-like main part (3) extending over the depth of the ink duct, has a recess (B) in the frontal area bordering of the ink knife (11) in a plane parallel to the frontal face (C) of the duct roller (1), which recess (B) is covered by the plate-like front part (4) abutting its inner side and the duct roller (1), and in that the front end, extending in the recess (B), of a seal (13), which is arranged in a groove (12) in the frontal face of the main part (3) facing the ink knife (11), can be pressed on to the front part (4), being adjacent to the ink knife (11).
