Abstract (en)

[origin: ES8300040A1] A process for the production of patterned tiles from thermoplastic synthetic resins includes the steps of forming a length of crude sheet stock by compressing uncolored and/or differently colored or multicolored particulate material of thermoplastic synthetic resin cutting off crude sheets from the sheet stock punching segments out of the crude sheets combining the segments from at least two crude sheets of differing colors into a panel so that the segments complement one another, and thereafter press-molding the segments to form an intarsia tile with the use of pressure and heat so that the segments are welded together along joints formed therebetween.

Abstract (de)

Aus uni- und/oder verschiedenfarbigen bzw. mehrfarbigen Chips, Granulaten, Teilchen, Schnitzel o.dgl. aus thermoplastischen Kunststoffen wird durch Verdichten, wie Walzen bzw. Pressen, eine Rohfellbahn (11) hergestellt, die Rohfelle in Segmente (11A, 11B) gestanzt und die Segmente aus mindestens zwei voneinander verschiedenfarbigen Rohfellen einander ergänzend zu einer Platte zusammengefügt und danach die Segmente unter Anwendung von Druck und Wärme zu der Intarsienfliese verpreßt und dabei entlang der Fugen miteinander verschweißt.
