Abstract (en)

The invention relates to the packaging of flat, stacked articles. The package 1 comprises a locally breakable, sealed envelope 2 for insulating its contents from the surrounding environment, and means such as reinforcements 5 and a band 9 for protecting it against impacts. The envelope comprises a device consisting of a lateral bellows 3 and of at least one end flange 4 which facilitates both manual and automatic handling. Identification and grouping-together means are associated with the envelope. Application to the packaging of, in particular, radiographic films.

Abstract (fr)

L'invention concerne le conditionnement d'articles plats empilés. L'emballage 1 comprend une enveloppe 2 scellée, localement frangible, pour isoler son contenu du milieu ambiant et des moyens, tels des renforts 5 et une ceinture 9 pour la protection contre les chocs. L'enveloppe comprend un dispositif constitué d'un soufflet latéral 3 et d'au moins un rabat terminal 4 qui facilite la manipulation tant manuelle qu'automatique. Des moyens d'identification et de regroupement sont associés à l'enveloppe. Application à l'emballage des films radiographiques notamment.
