Abstract (en)

[origin: EP0052596A2] The suspended packet is partic. for textile items, and comprises a shape-retaining supporting component (1) for the item, and to which a suspension member is fixed (3). The suspension member is passed through a flexible wrapping placed round the item. The supporting component can be a relatively stiff plate with a rectangular main surface forming the back of the packet, and two flaps at opposite edges bent over inwards, the items being enclosed between them and the suspension member fixed to one of them.
