Abstract (en)

[origin: US4462656A] An installation system of labeled conductors including plugs as well as connecting centers for permanent yet still flexible circuit connections, which also produce plug connections leading to a plurality of conductors. The system provides that (a) the connecting center includes contact rails directly connected to the leads of a conductor, which form a plurality of tongues for the socket contacts in socket plugs; (b) wherein the housing has the plug receivers receive the tongues in a recessed manner and forms protective collars fitted to the plugs; (c) and wherein at least one plug receiver is formed for connection to all contact rails.
