Abstract (en)
[origin: EP0053690A1] 1. An arrangement (9) for fastening a test line (7) to connection terminals of electrical devices, which terminals are covered (2) so as to be safe from contact and are accessible by way of a cylindrical opening (14) characterised in that a permanently magnetic, cylindrical intermediate component is inserted between the test line (7), or test plug (8) and the connecting terminal (5).
