Abstract (en)
[origin: EP0053875A1] A high temperature insulation panel comprises a backing element (W) and a heat insulating lining (M), the lining comprising portions of ceramic fibrous material, each portion having two spaced apart leg portions (1, 2) with a space (S) in between, the portions being held together by one leg of one portion being received in the space between the legs of its neighbouring portion. In this way a highly efficient heat insulation panel is formed.
