Abstract (en)  
[origin: EP0054167A2] 1. Apparatus for the manufacture of concrete panels (1) having a fixed concreting station, pallets (2) movable through the concreting station, front and back and side stops (3) provided at the concreting station that can be placed on a pallet that has been moved into the concreting station to make up a composite frame, and then taken away again, and having pushing devices (6) to which the side stops are fixed, characterised by the combination of the following features : a) the front and back stops are also fixed to pushing devices (6), b) the stops (3) are movable by the pushing devices (6) in the horizontal direction at right angles to their framing surfaces (31), c) each pushing device (6) is arranged on a slide or carriage (51 to 54) and can be moved by this parallel to the framing surface (31) of the stop (3) that it serves to move, d) the stops (3) are movable in succession on the pallet (2) in such a way that one end face (32) of each stop abuts against the framing face (31) of another stop.
