Abstract (en)

1. A petroleum distillate exhibiting improved lowtemperature properties and consisting of hydrocarbons boiling in the range from 130 to 420 degrees C, which contains an oil-soluble acid amide alone or in combination with conventional agents for improving the flow behaviour and/or the pour point, which acid amide is prepared from a polyamine and a fatty acid mixture containing oleic acid and palmitic acid as main components.

Abstract (de)

Gasöle mit verbessertem Kälteverhalten erhält man, wenn man, gegebenenfalls zusätzlich zu üblichen Mitteln zur Verbesserung des Fließverhaltens und/oder des Stockpunkts, ein öllösliches Säureamid eines Polyamins mit einer wenigstens 8 C-Atome aufweisenden Fettsäure oder einer freie Carboxylgruppen enthaltenden fettsäureanalogen Verbindung zusetzt.
