Abstract (en)  
[origin: WO8101953A1] A staple cartridge for use in skin and fascia closure of the type in which staples in the course of their ejection from the cartridge are formed about an anvil (37) located at the forward end of the cartridge, in which for the purpose of preventing excessive penetration of staples into the tissue, projections (53) extend beyond the forward surface of the anvil on either side thereof.

Abstract (fr)  
Cartouche d'agrafes destinee a etre utilisee dans la fermeture de tissus cutanes ou de fascia, du type dans lequel les agrafes au moment de leur ejection de la cartouche sont formees sur une enclume (37) situee sur l'extremite interieure de la cartouche, dans laquelle dans le but d'empecher une penetration excessive des agrafes dans le tissu, des saillies (53) depassent la surface interieure de l'enclume sur chaque cote de celle-ci.
