Abstract (en)

[origin: EP0055791A2] An inflatable armband 1 suitable for use when swimming comprises a plurality of parallel inflatable buoyancy means 9 and 10 and a connecting member which consists of a non-inflatable section 6 and inflatable chambers 12 to 15 having substantially reduced cross-sectional area in relation to the cross-sectional area of the buoyancy means 9 and 10, which connecting member connects the ends of the buoyancy means and rests on the inside of the upper arm of the user when the armband 1 is in normal use, such that, when one or more of the buoyancy means are inflated, the armband 1 can remain unsupported on the upper arm of the user. <IMAGE>
