Abstract (en)
[origin: EP0056070A1] 1. Seating furniture with a frame (1) having a guide (29) which allows essentially horizontal displacement of a seat surface (3) relative to the frame (1), there engaging on the frame (1) on the one hand and on the seat surface (3) on the other hand a spring element (6) which prestresses the seat surface (3) rearwards into an initial position, and also with a back-rest (2), to the upper end of which is attached pivotably a head-rest (21) connected operatively (25) to the seat surface (3) in such a way that, when the seat surface (3) is displaced forwards, the head-rest (13) is pivoted about a horizontal axis (22) forwards into an approximately vertical position, characterised in that when the seat surface (3) is displaced rearwards the head-rest (13) is pivoted into an approximately horizontal position.
