Abstract (en)

[origin: US4411946A] 7-Hydroxy-coumarin compounds of the general formula <IMAGE> wherein A represents a heterocyclic radical, which can contain non-ionic substituents customary in dye-stuff chemistry, R represents hydrogen or cyano and Z represents oxygen or NH and the ring B can be further substituted non-ionically, are used for impregnating paper, in particular paper which has to be made forgery-proof.

Abstract (de)

7-Hydroxy-cumarin-Verbindungen der allgemeinen Formel <IMAGE> worin A für einen heterocyclischen Rest, der in der Farbstoffchemie übliche nichtionogene Substituenten enthalten kann, R für Wasserstoff oder Cyan und Z für Sauerstoff oder NH stehen und der Ring B nichtionisch Weiter substituiert sein kann, finden Verwendung zum Imprägnieren von Papier, insbesondere von fälschungssicher zu machendem Papier.
