Abstract (en)

A rucksack (10) comprises a flexible sack (12) and a rigid support frame (14) for the sack (12) which forms part of an extensible structure (20) which can assume a contracted, carrying state and an extended state of use in which it forms a camp-bed framework (38) and a tent support (40). Sheets (42, 44) are attached to the extensible structure (20) and cooperate with the camp-bed framework (38) and with the tent support (40) to complete a camp bed and to form a tent which covers the bed.
