Abstract (en)

A process to prepare a suede-like raised fabric having extra fine naps, wherein the process comprises producing a raised fabric of a polyester composite fiber which consists of constituents hardly soluble in an alkali solution and constituents easily soluble in an alkali solution containing 3 to 12% polyalkylene glycol and/or anionic surfactant by weight and removing by solution the constituents easily soluble in an alkali solution contained in the composite fiber by treating the raised fabric in an aqueous alkali solution at 110 to 150 DEG C.
